

Tables of nontrivial Spin Space Group

This material contains the full list of the nontrivial spin space groups G_{NS} , including their four-segment identification (L_0, G_0, i_k, m) , transformation matrices M_T that relates the basis of G_0 with that of L_0 , coupled point groups in spin space G^S , and the International notation. In the table below, ** denotes spin space groups (SSGs) supporting only collinear magnetic configurations, * denotes SSGs supporting only noncoplanar magnetic configurations, while all others support coplanar magnetic configurations. The extended International notations and Seitz symbols for SSGs are provided in Appendix B. Any SSG can be constructed using the International notation, as exemplified in Appendix C.
